EDUCATION

University of British Columbia | 91% (**Dean's Scholar**) *Sep 2025 - May 2030*

Bachelor of Science in Computer Science

- **Software Construction** (Java), **Data Structures & Algorithms** (C++), **Data Science** (R)

TECHNICAL EXTRACURRICULARS

Hack the Coast Hackathon | *GML, GameMaker* *Feb 2026*

UBC Science Undergraduate Society

- Engineered a social awareness game using **GameMaker** to advocate for homeless shelter and food bank funding.
- Combined hand-written GameMaker Language (**GML**) scripts with **AI-assisted code** to accelerate development, debug complex logic, and optimize gameplay mechanics.

Robotics Team Designer and Programmer | *C++, PROS, VEX V5* *Sep 2022 - Jun 2025*

VEX Robotics Competition - Western Canada High School Robotics

- Programmed and optimized **autonomous routing** using **PROS in C++**, improving runtime by **50%** using **PID** and **ranked #1** in Alberta skills.
- Prototyped and designed a robot to perform spatial, score-objective tasks under strict time and hardware constraints.
- **5 awards** in 2025, including **Provincial Champion Skills Award** and **World Championship Create Award.**

Robotics Club Executive *May 2023 - Jun 2025*

VEX Robotics Competition - Western Canada High School Robotics

- Mentored **50 members** on the core principles of robotics, including mechanical, software, and structural engineering.
- Led **8 teams** to over **10 competitive provincial and global tournaments**.

WORK EXPERIENCE

Tech Specialist/ Camp Counsellor *Jul 2026 - Aug 2026*

Camp STEAM Canada

- Supported campers and staff with technical hardware at an engineering summer camp, instructing students in block-based coding using **Minecraft Education, LEGO Spike,** and **Micro: bit**.
- Managed hardware such as 3D printers and Chomebooks for the campers.
- Communicated with other counsellors to create better learning experiences for campers.

PROJECTS

WNBA Predictor | *R, Tidyverse, Project Jupyter, CSV* *Jan 2026 - May 2026*

- Applied machine learning algorithms to engineer a **KNN classification model** using **R and tidyverse.**
- **Cleaned, transformed, and analyzed** WNBA **CSV data** to **forecast** standings based on win percentages.

Monke | *Python, Discord.py, Nextcord, Discord API, JSON* *Sep 2019 - Sep 2022*

- Developed an automated bot program using **Python** to connect to **Discord API.**
- Implemented **server moderation commands** to simplify admin rule enforcement.
- Integrated **50+** economy, entertainment, and moderation commands for server owners.

TECHNICAL SKILLS

Languages: Java, Python, C++, C#, GML, R, Racket

Tools: GitHub, VS Code, Project Jupyter, DrRacket, GameMaker, Discord Dev, FlashForge

Concepts: OOP, machine learning, data structures, optimization, recursion, game development, data analysis
